

GREENHOUSE APPLICATION

GREENHOUSE WRAP

INSULATING FROST PROTECTION PERFORMANCE
IN A 4mm EASY FIT LAYER

1M x 6M & 1M x 9M

Strong 4mm thick bubble with high reflective foil facing to one side.

- > Stops ground frost
- > Keeps warmer in winter and summer
- > Equivalent to 30mm of polystyrene
- > Lightweight and easy to use
- > Fast and simple
- > Secure with clips, pins or staple gun

INSTALLATION

Installation is simple, see pack product for installation details.

FIXING TO A TIMBER FRAME

Greenhouse Wrap can be attached to the uprights of a timber greenhouse with corrosion resistant pins or with a staple gun positioned near the bottom, centre and top of the insulation.

FIXING TO AN ALUMINIUM FRAME

Greenhouse Wrap can be attached to an aluminium greenhouse frame with greenhouse clips, available from garden centres.
